Stereo Pre Main Amplifier

MARANTZ DESIGN AND SERVICE

Using superior design and selected high grade components, MARANTZ company has created the ultimate in stereo sound. Only **original MARANTZ parts** can insure that your MARANTZ product will continue to perform to the specifications for which it is famous.

Parts for your MARANTZ equipment are generally available to our National Marantz Subsidiary or Agent.

ORDERING PARTS:

Parts can be ordered either by mail or by telex. In both cases, MARANTZ part number has to be specified. If you order by mail, fulfil MARANTZ order forms.

MARANTZ S.A.
EUROPEAN PARTS DEPARTMENT
2, Avenue Léopold III
B-7120 PERONNES-lez-BINCHE
BELGIUM
TWX: 57589 SEPLT B

The following information must be supplied to eliminate delays in processing your order:

1. Complete address
2. Complete part numbers and quantities required
3. Description of parts
4. Model number for which part is required
5. Way of shipment
6. Signature: any order form or telex must be signed otherwise such part order will be considered as null and void.

PARTS ORDERING:

Parts may be ordered from the following addresses:

Brookvale, N.S.W. 2100
Australia
Telex: 24121

All of the above locations are fully equipped to take care of your total service needs. Because various countries have differing configuration requirements, it is necessary that you contact the service facility in your particular country. In the event that there is no service location listed for your country, please, contact the nearest facility for the necessary assistance.

In case of difficulties, do not hesitate to contact the Technical Department at abovementioned address.

MODEL PM230 STEREO AMPLIFIER

INTRODUCTION

This service manual was prepared for use by Authorized Warranty Stations and contains service information for the Marantz Model PM230 Stereo Console Amplifier.

Service information and voltage data included in this manual are intended for use by knowledgeable and experienced personnel only. All instructions should be read carefully. No attempt should be made to proceed without a good understanding of circuitry operation.

The parts list furnishes complete ordering information. Most replacement parts should be ordered from the Marantz Company. However, a simple description is included for parts which can be obtained locally.

1. FUNCTION SWITCH

The function switches control a high voltage (25 V) type switching IC (LC7185H) to select one of the four inputs and the tape monitor channel which is selected with the TAPE OUT/MONITOR switch. The TAPE OUT/MONITOR switch controls a high voltage-type switching IC (LC4066 BH).

The source which is selected when the power switch was turned off is automatically reselected when the power is turned on.

The signals from the AUX, TUNER and TAPE (1) input terminals are applied to electronic switch QS01. The signal from the PHONO input terminals are amplified (35 dB) and equalized by equalizer amplifier Q401, then applied to electronic switch QS01.

The signals from the TAPE (2) IN terminals are applied to electronic switch QS02, then applied to QS01.

2. MAIN VOLUME

A 100 k Ω (B curve) potentiometer is used for the main volume control and a 200 k Ω (W curve) potentiometer is used for the balance control.

3. PREAMPLIFIER

The first stage of the preamplifier uses op-amplifier NJM 4560DD (selected for internal noise) (QE01) and has a gain of about 20 dB. Loudness control elements are inserted in the NF circuit of this stage so that frequency response is increased by 6 dB at 100 Hz.

The second stage is an NF type tone control circuit using op-amplifier NJM4558D (QE02). The frequency response can be varied with slide type potentiometers as shown below.

TREBLE ± 10 dB at 10 kHz
BASS ± 10 dB at 100 Hz

4. MODE SWITCH CONTROLLER

The loudness control uses a slide switch with a stroke of 1.5 mm to control the loudness elements in stage 1 of the preamplifier.

The low filter circuit follows the 2nd stage of the pre-amplifier and has an attenuation of 3.0 dB at 50 Hz.

5. POWER AMPLIFIER

Hybrid IC STK-3042-IIA is used for the voltage amplifier, and the power amplifier stage uses discrete transistors. STK-3042-IIA is an improved version of STK-3042 and it shows good performance with pop noises. Thus, no muting relay is required for the PM230. The input stage of the power amplifier uses 2SD1302 (QK03 and QK04), which features low Vce saturation so that the output signal is muted when the function switch is operated or the power is turned on and off. (The gain is about 30 dB.)

6. SPEAKER

Only the "SYSTEM 1" speaker terminals can be used. The speakers are automatically disconnected when a headphone plug is inserted in the headphone jack.

7. P.W. BOARDS

As can be seen from the circuit diagram the chassis of Model PM230 consists of the following units. Each unit mounted on a printed circuit board is described within the square enclosed by a bold dotted line on the circuit diagram.

1. Phono Amp./
Input Terminal mounted on P.W. Board P400
2. Main mounted on P.W. Board P700
3. Tone Amp. mounted on P.W. Board PE00
4. Tone Volume mounted on P.W. Board PE01
5. Low Filter mounted on P.W. Board PE02
6. Tone Amp.
Volume Control mounted on P.W. Board PE03
7. Balance Volume mounted on P.W. Board PG02
8. Main Volume mounted on P.W. Board PS02
9. Power Switch mounted on P.W. Board PO01
10. Speaker Terminal mounted on P.W. Board PV00
11. Phone Jack mounted on P.W. Board PW01
12. Function mounted on P.W. Board PX00

8. TEST EQUIPMENT REQUIRED FOR SERVICING

This table lists the test equipment required for servicing the Model PM230 Stereo Pre Main Amplifier.

Item	Use
Distortion Analyzer	Distortion measurements
Audio Oscillator	Sinewave and squarewave signal source
AC VTVM	Voltage measurements (AC)
Oscilloscope	Waveform analysis and trouble shooting and ASO alignment
Circuit Tester	Trouble shooting
DC VTVM	Voltage measurements (DC)
AC Wattmeter	Monitors primary power to amplifier
Line Voltmeter	Monitors potential of primary power to amplifier
Variable Autotransformer (0 ~ 140V AC, 10A)	Adjust level of primary power to amplifier
Shorting Plug	Shorts amplifier input to eliminate noise pickup

9. ADJUSTMENT PROCEDURES

Idling adjustment

- 1) Open all input and output terminals on the unit.
- 2) Connect a digital voltmeter between the + and - terminals of TP-1 for the L channel or between the + and - terminals of TP-2 for the R channel.
- 3) Adjust R729 (channel L) or R730 (channel R) so that the voltmeter reads 7 mV about 1 minute after the power has been turned on. (Note that the idling current is about 20 mA after the unit has warmed up.)

10. VOLTAGE CONVERSION

• EUROPEAN MODEL ONLY

To convert the unit to a different power source voltage, change the position as illustrated in the drawing below.

CAUTION
DISCONNECT POWER SUPPLY CORD FROM AC
OUTLET BEFORE CONVERTING VOLTAGE.

Voltage Conversion Chart

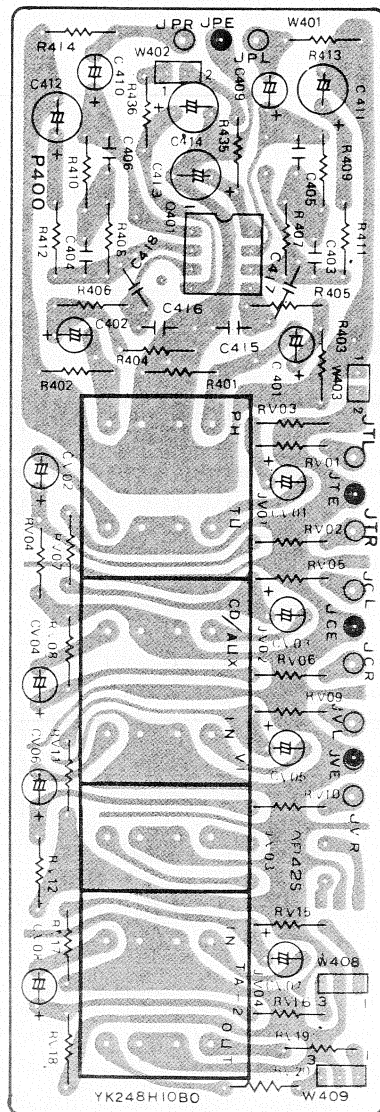

Note on safety: Symbol \triangle Fire or electrical shock hazard. Only original parts should be used to replace any part marked with symbol \triangle . Any other component substitution (other than original type), may increase risk of fire or electrical shock hazard.

Symbol △ Fire or electrical shock hazard. Only original parts should be used to replace any part marked with symbol △. Any other component substitution (other than original type), may increase risk of fire or electrical shock hazard.

15. TECHNICAL SPECIFICATIONS

AUDIO SECTION

POWER OUTPUT PER CHANNEL

DIN 4 OHMS	33W
RMS 4 OHMS 1 kHz	33W
DIN 8 OHMS	30W
RMS 8 OHMS 1 kHz	30W
TOTAL HARMONIC DISTORTION AT RMS 8 OHMS	0.05%
I.M. DISTORTION 8 OHMS	0.05%
DAMPING FACTOR 8 OHMS (1 kHz)	50

MM CARTRIDGE INPUT

Frequency Response (RIAA) 20 Hz — 20 kHz	±0.5 dB
Signal-to-Noise Ratio	80 dB
Input Impedance	47k ohms
Input Capacitance	270 pF
Input Sensitivity	2.5 mV
Equivalent Input Noise	1.3 μ V

AUX. INPUT

Input Impedance	30k ohms
Input Sensitivity	150 mV
Frequency Response	10 Hz ~ 40 kHz
Signal-to-Noise Ratio	90 dB

OUTPUT VOLTAGE

Tape Out	460 mV
----------	--------

OUTPUT IMPEDANCE

Tape Out	290 ohms
----------	----------

GENERAL

Power Requirement	110/120/220/240V AC, 50/60 Hz
Power Consumption at Rated Output, both Channels Driven	120W
Dimensions	
Panel Width	416 mm
Panel Height	55 mm
Depth	260 mm
Weight	
Unit Alone	4.8 kg

Specifications and appearance are subject to change for modification without notice.
